

Electronic Health Record Survey for Practitioners - Help to Shape the Future!

eHealth Saskatchewan's **HEALTH CARE PRACTITIONER SURVEY** regarding **ELECTRONIC HEALTH RECORDS** is now live and can be accessed through the link <http://bit.ly/SKSURVEY> or www.facebook.com/EHealthSaskatchewan and it will close at midnight on Friday, September 7, 2012.

This survey is an excellent opportunity for health care providers, direct users of electronic health records, to have input into what is working well with the technology and identify where opportunities exist to make improvements.

Running parallel to health care provider input is a public engagement consultation program. This is designed to capture the public's feedback on ways to improve the system. eHealth Saskatchewan will capture all of this information and use it to shape the future of this technology in our province.

In addition to the on-line surveys, electronic health record meetings are taking place around the province. Professionally facilitated by Conroy Ross Partners, these sessions are designed to bring together a broad mix of health care practitioners for face-to-face discussions regarding the use and the future of electronic health records. Any practitioner who is a direct user of electronic health records is welcome to attend.

For all locations, the day is divided into two meeting opportunities. The AM session (8 am to noon) is designed for Acute Care Practitioners with the PM session (1 pm – 5 pm) focusing on Community and Extended Care (Physiotherapy, Chiropractic, Mental Health, Occupational Therapy, Home Care, etc).

Meeting dates and locations are as follows:

Monday, August 20 Regina	Tuesday, August 21 Saskatoon	Wednesday, August 22, Prince Albert	Tuesday, August 28 Swift Current	Thursday, August 30 North Battleford
--------------------------------	------------------------------------	---	--	---

If you wish to register for one of these meetings, please send an email identifying your meeting of choice to: Jennie Avram, Avram Events Inc. & Parachute Communications
